TO ALL ROOTES GROUP DEALERS

We have, for some time, received inquiries from many Dealers requesting training material with respect to several of the components fitted to our products, namely the Laycock DeNormanville overdrive as well as the Easidrive transmission.

We are happy to announce that our overseas company has produced rather complete filmstrips with the appropriate recording, lesson plans and pocket manuals in the form of a training kit.

The Part Number for the Overdrive training material is 5604. The Part Number for the Easidrive Transmission Diagnosis is No. 5812 and the course for Easidrive Linkage Adjustments is 5909.

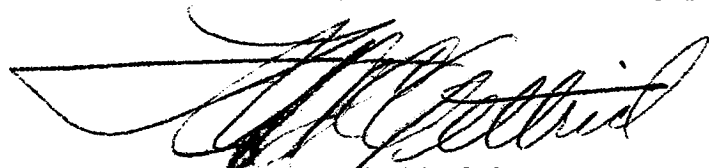

These are available on special order through our Parts Department in Long Island City under the appropriate numbers at a Dealer cost of \$15.00 per kit. We feel in line with the requests previously received all Dealers will want to avail themselves of these training materials to perpetuate training their own personnel which at times requires refurbishment.

As additional training kits become available their contents will be advised to you when we should be very pleased to act on your requirements.

Kindly bring the foregoing to the attention of all concerned at your location.

Very truly yours,

ROOTES MOTORS INCORPORATED
